

## **BIM Designer/Technician**

### **Responsibilities:**

Daily responsibilities will include:

- Working as part of the Structural Design team with a strong work ethic that is consistently exhibited in attitude and personal drive.
- Utilizing effective communication to collaborate on design tasks as they evolve, while self-managing time and priorities to help achieve project deadlines.
- Successfully understanding construction plans, both by interpreting design intent and changes, and the ability to produce accurate and clear structural construction documents in Revit.
- Analyzing sketches, notes, and other input material to determine and plan the best approach for developing complete drawings with minimal supervision.
- Embracing company standards for drafting plans and details that accurately and clearly convey the correct design elements and intent.
- Working with clients or other consultants to manage multiple BIM files for project coordination, often hosted on Autodesk Construction Cloud (BIM360), and proactively communicate design concerns with project managers and team.

### **Qualifications:**

- Associates Degree or Diploma in Architectural and Engineering Computer-Aided Design or equivalent work experience.
- 1-4 years' experience using Revit
- Experience with any of the following software: Bluebeam, BIM360 and AutoCAD Software is a plus
- Candidates must be proactive, have strong organizational skills, excellent written and verbal communication skills, and work well with a team.
